

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

Costume. Brooklyn Public Library. A reading and reference list on costume. Brooklyn, N. Y., 1909. 64 p.

The primary purpose of this list is to furnish a partial guide to the resources of the Brooklyn Public Library on the subject of costume. There are practically no periodical references, and post-cards, works of art, jewelry and other articles primarily artistic in nature are not included. The list was prepared two years ago by Mr. Frank K. Walter, now vice-director of the New York State Library School, while he was assistant reference librarian of the Brooklyn Public Library. Additions have since been made by the reference librarian and the assistant reference librarian.

Railroads. Meyer, H. H: B., *comp.* Select list of references on the valuation and capitalization of railroads. Wash., D. C. [Supt. of Docts.], 1909. 28 p. 4°. pap., 10 c.

The subject was found to be so interwoven with that of railroad capitalization that it proved inexpedient to separate the two. The list therefore includes both subjects, with emphasis only on railroad valuation. The material scattered through the various state reports is of increasing importance in the issues for the more recent years. No attempt, however, has been made to index it in detail. A few works on the economies of railroad construction have been included because of their relation to the subject.

Railroads. Meyer, H. H: B., *comp.* Select list of references on the valuation and capitalization of railroads. Wash., D. C. [Supt. of Docts.], 1909. 28 p. 4°. pap., 10 c.

The subject was found to be so interwoven with that of railroad capitalization that it proved inexpedient to separate the two. The list therefore includes both subjects, with emphasis only on railroad valuation. The material scattered through the various state reports is of increasing importance in the issues for the more recent years. No attempt, however, has been made to index it in detail. A few works on the economies of railroad construction have been included because of their relation to the subject.

SELECT LISTS OF LIBRARIES IN THE UNITED STATES AND CANADA.

Digitized by Google

A SELECT LIST OF LIBRARIES IN THE UNITED STATES.

This list is intended to include the leading public or semi-public libraries in the United States, not including school libraries, which have not less than 10,000 volumes, and $2000 annual income, and spend not less than $400 annually for books. A number of growing libraries, above a minimum of 5000 volumes, $1000 annual income and $200 annual book expenditures, are also included. The figures are for the last library year, which varies in different libraries, but in some cases where a library has failed to supply recent data the latest statistics available are given. Where a library has failed to respond to queries its name may not be found in this list; but it is believed to include the leading live libraries.
